

MadTest WL Series

MadTest Instruments introduces the WL-14 Auxiliary Functions Adapter for the Siemens WL family of circuit breakers.

An incredible time saver when troubleshooting or performing scheduled maintenance.

MADTEST INSTRUMENTS WL-14

Auxiliary Functions Connector for Siemens WL Circuit Breakers.

Introducing the MadTest WL14. This adapter was designed to easily access to the 14 pin OEM connectors on Siemens WL rackmount or fixed mount breakers. As the connector will need to move through the different (X Positions) to access all of the installed auxiliary functions of the circuit breaker. The connector has a 6-foot whip that allows the test tech to easily access all 14 pins of the connector with banana jack easy access ports.

- The back of the WL-14 offers X5 -X6 -X8- X9 Secondary Terminal Assignments for quick reference
The QR code will provide the OEM suggested testing procedures.

The WL-14 is designed to be used within a rack or a fixed mount connection assembly. The adapter and whip with connection points allows easily access to the electrical contacts within the circuit breaker. The adapter allows quick access for maintenance and troubleshooting of the WL's operating functions.

MadTest Instruments provides application field engineers, service technicians, and end users a proper way to access the auxiliary functions of the WL breakers. Our adapters are designed to last a lifetime and are the right tool for the job. Each of our adapters are hand built, designed and manufactured in the USA. With the implementation of the MadTest adapters like these, entry level technicians can have a better understanding the electrical functions of the circuit breakers and be able to write consistent test procedures that promotes consistency across the industry.

Specifications.

- WL Base unit Part Number # WL-001
- WL Whip 6-foot Connector Part Number # WL-002
- WL Banana Jacks cable 36 Inches female to female Part # WL-003
- WL Jumper Part # WL-004
- Nanuk Case 923 with foam Part # WL-005
