

MadTest EB Series

MadTest Instrument introduces the EB series of advanced adapters for the DS Magnum Low voltage circuit breakers.

Now the correct adapters and test plugs for a job long overdue in the field. The EB series adapters allow a test technician an easy path to test the auxiliary functions as well as the trip unit.

The GZ2i1 is the GROUND-ZONE Interlock control module. Now you can defeat the ground, or zone interlock independently or together 2 functions in one adapter.

The EB6i1 primary function adapter this compact break out adapter allows you to quickly access the Auxiliary functions Close, Shunt Trip, Charge, Under Voltage, Ground Defeat and Zone Interlock

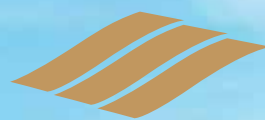

The MadTest EB-30 is the all-access adapter for the Magnum DS circuit breakers. The design allows for consistent connection points to the auxiliary functions of circuit breaker. This eliminates the potential for cross connections, damaging the connector pins, and allows test technicians the ability to develop consistent test procedures for data acquisitions and trending past test results. The EB-30 will work inside any switchgear configuration harness for easy access. The advanced adapter will not only improve the accuracy of all testing but it will speed up the testing guaranteed.

The EB6i1 and EB30 can be used together or independently. We tested all of our adapters using the ETI-ACDC10 shown right.

All MadTest Adapters come with a 2-year manufactures warranty. Our adapters are made in the USA and come with custom foam cutout NANUK cases. Our products save your technicians valuable time, every time guaranteed.
